MULTILINE NEXT AC+ OPERATING TABLE

The new AC version sets new standards in terms of accessibility:
The new model offers optimal access to the patient – ideal for procedures where flexibility and freedom of movement for the surgical team are crucial.

The design allows for close collaboration between surgery, anesthesia, and assisting personnel at the patient in a wide variety of positioning options. At the same time, the operating table remains versatile due to its mobility and compact design – whether in daily clinical routine or in outpatient care.

The MULTILINE NEXT AC+ operating table can be adjusted to any position quickly and smoothly, with no limits to its motorised adjustment.

MULTILINE NEXT AC+ OPERATING TABLE

A new member of the AC family: The new MULTILINE NEXT AC+ operating table impresses with the renowned quality of GREINER. Ergonomics, stability, mobility and safety combine to create the perfect solution for outpatient surgery. Close access to the patient enables the most precise and smallest procedures to be performed to perfection. The powerful battery maintains mobility and safety for hours. The table-compatible height adjustment is infinitely variable and motorised, and is as intelligent as it is easy to operate using the selection and control buttons on the GREINER control element.

Hygiene

Meets all surgical standards, perfect access, clean surface finish, minimum number of sutures.

Patient access

Close access to the patient enables the most precise and smallest interventions to be performed to perfection.

Minimal space requirement

Real chair position with 90° inclination of the leg section – ideal for entering at a height of 58 cm, minimal space requirement.

Mobility

12.5 cm swivel castors for comfortable travel, central braking system, powerful battery. One wheel adjustable for perfect mobility when travelling in a straight line.

Headrests of your choice

With the Vario double joint. The new intuitive quick-release fastener. Available as replacement pads or full and half shells.

Standard rails available as optional add-on

Standard rail system made of stainless steel on the side and rear panels for mounting numerous GREINER items.

Hand switch with integrated operating guide

Safety

In an emergency, the foot switch can be used to adjust the shock position (Trendelenburg) continuously.

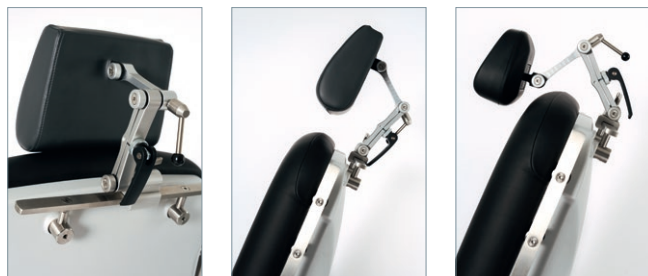

Height adjustment from 58 to 90 cm

Electric height adjustment with hand or optional foot switch.

New Vario double joint

The flexible Vario headrests impress with a new head section that is intuitive to operate. The clever quick-release fastener allows tool-free attachment and detachment within seconds, while the new, integrated levers make handling noticeably easier. Consequently, the Vario double joint allows the surgical team to adjust the patient's positioning more quickly – an advantage during time-critical procedures and frequent position changes.

Various headrest shapes for tool-free exchange.

MULTILINE NEXT AC+ OPERATING TABLE – for outpatient surgery

- ◆ Surgical centres / day clinics
- ◆ Ophthalmology
- ◆ Dermatological surgery
- ◆ Cosmetic and plastic surgery
- ◆ OMS + ENT surgery
- ◆ Trauma surgery

Applications

- ◆ Chair entry at 58 cm, height adjustment to 90 cm like an operating table
- ◆ Cosmetic procedures in the facial area – access in 12 o'clock position
- ◆ Minimally invasive surgical procedures on skin and limbs directly at the surgery chair
- ◆ Attachment of Göpel leg holders for gynaecological positioning
- ◆ Version without side rails allows for an even wider range of applications
